## %%%%%%%%%----- **NODE.JS INSTALLATION**-----%%%%%%%%%

Your system need to install node.js

A detailed procedure for installing node.js in ubuntu is described in the link

<https://tecadmin.net/install-latest-nodejs-npm-on-ubuntu/>

video link:

<https://www.youtube.com/watch?v=WeEKAhEm67Q>

you need to install the latest version

install stable version

### **For checking node**

node -v

version 6.10.3

(version above 6 is safe because all modules will work with no problem).(learned from my work)

npm -v

version 3.8.9 above

npm is the package installer for node modules.

-----  
If above everything is perfectly done.

### **for checking that node/npm works on your system perfectly**

<https://expressjs.com/en/starter/hello-world.html>

if you are able to see homepage on localhost on 3000 port number

then :), you have successfully installed node js.

Go through the above link .

-----

%%%%%%%%%%%% ---- **MONGODB INSTALLATION** ----%%%%%%%%

mongodb installation link

<https://docs.mongodb.com/v3.0/tutorial/install-mongodb-on-ubuntu/>

video

<https://www.youtube.com/watch?v=WbweLu1cZvE>

to start mongodb

<https://askubuntu.com/questions/61503/how-to-start-mongodb-server-on-system-start>

if everything works fine app.js will work.

HOW TO RUN app.js IS EXPLAINED IN run\_appjs FILE
